Dear City of Seattle,

As a resident of the Seattle's South End, I would like to ask the City to allow for full public participation in the decision process surrounding:

Mapes Creek Natural Area at Kubota Garden
Project 3018093 at 9666 51st Ave S.

Specifically, I would like to urge the city to hold a public hearing to consider alternate views on the the disposal of this unique parcel of land.

Those of us living in the South End know there is relative lack of natural areas and parks in the South End compared to the North End and urge the City to help balance this inequity by protecting this area for future generations of South End residents. It's proximity to Kubota Gardens suggests options for expansion of this valued resource.

Retaining tree coverage and habitat is also sound environmental policy.

At the very least the residents of Seattle deserve a hearing.

Thank you,

Jennifer Harris
